How to determine the correct ring size

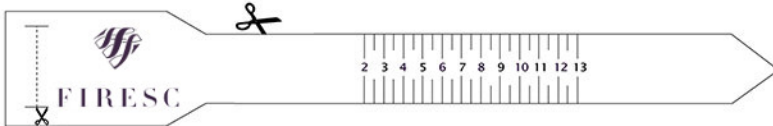

Please carefully read all instructions as the measurement may not be accurate if not done properly

1. Prior to printing, ensure that page scaling is set to "none" on your print dialog box.
2. Measure the bar on the left to ensure it is exactly 2 inches, or 50 mm long.
3. If measurement is not accurate, check that you are printing the page at full size and reprint before continuing.

METHOD 1

1. Carefully cut along the outline of the sizer. Make a small slit in the left end of the sizer.
2. Wrap the sizer around the intended finger with the numbers facing out.
3. Slide the pointed end of the sizer through the slit.
4. Move the sizer to the largest part of the finger.
 - this might be the knuckle.
5. Pull tightly. The sizer must fit snugly to produce an accurate size.
6. The number that lines up at the slit represents the ring size for that finger.

* Avoid measuring cold fingers as this is when fingers are at their smallest.

* Measure your finger when it is at its largest, at the end of the day.

METHOD 2

1. Select a ring that properly fits the intended finger.
2. Place the ring over the circles below, matching the inside edge of the ring to the circle nearest in size. This measurement refers to the diameter of the ring.
3. If the ring falls between two sizes, order the larger size.

* You can use this method to order a ring for someone without ruining the surprise. Borrow a ring you know fits their finger well, and use the circles below to measure.
